

Stepper Motor Cable

Based on Moons’ public documents and our customer’s requirements, we released many of Off-The-Shelf cables to support stepper Motor Cable.

Most of cables are using UL3266 Hook Wires which have very good performance in Temperature and Voltage. And we also provide more length options to meet customer’s application. In addition, PVC Tube can be added on the cable to provide better protect.

We also can customize the cables with shielded round cable.

Cable type:

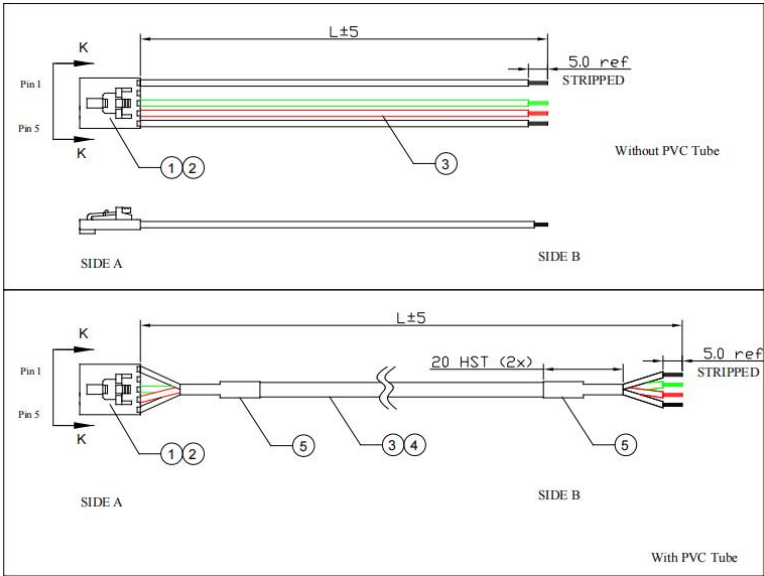

Standard Wire Harness

Wire Harness With PVC Tube
(Without Shielding)
